

LIVE DEMO Schedule at Vision Expo 2026

Live demos run all day, but we curated a schedule, so you don't miss the standout demos at these booths:

Thursday, March 12 & Friday, March 13

10:30am

- **Thema Optical, Booth #1141:** Join Thema Optical for a live **CNC Milling Demo** and see how fully customizable Italian Design, Made-in-Miami eyewear is digitally designed and precision-cut in real time.
- **Coburn Technologies & Huvitz, Booth #3829.** Our live edging demo showcases how our systems unlock exceptional performance and precision with various coatings and substrates while creating new opportunities to boost workflow efficiency and overall profitability for your practice.

11:00 AM

- **DAC Vision/National Optronics, Booth #3627:** See our new 10 Series live demos of tabletop dry-edges 10Edge, frame tracer 10Trace and lens blocker 10Block, offering unmatched durability, ease of use, and reliable support.
- **GoodVision USA, Booth #1809:** Watch prescription glasses get made live from a single piece of wire using the world's smallest eyeglass factory — the portable, electricity-free technology that's brought vision care to over 1 million people in 11 countries.
- **FastGrind by SuperOptical, Booth #2836.** See FastGrind in action! Learn how this system can revolutionize your in-office lens production. Improve control, increase customer satisfaction, and lower your lens costs.

12:00 PM

- **Ocuco, Booth #456.** Join Ocuco as they demo their Practice Management Software (PMS), Lab Management Software (LMS), and services to enhance your ROI.
- **Horizons Optical, Booth #3529:** Discover your gaze dynamics. With mimesys®, we can create fully personalized lenses from scratch. During Vision Expo, we are launching our Single Vision and Anti-Fatigue solutions within the mimesys® universe. Come and see how it works!

1:30 PM

- **Coburn Technologies & Huvitz, Booth #3829.** Our live edging demo showcases how our systems unlock exceptional performance and precision with various coatings and substrates while creating new opportunities to boost workflow efficiency and overall profitability for your practice.

2:00 PM

- **Thema Optical, Booth #1021:** Experience a one-on-one consultation with our **professional colorist** to identify the tones that best complement you, while discovering how we customize acetate colors and finishes to create truly unique, personalized eyewear.

- **DAC Vision/National Optronics, Booth #3627:** See our new 10 Series live demos of tabletop dry-edges 10Edge, frame tracer 10Trace and lens blocker 10Block, offering unmatched durability, ease of use, and reliable support.
- **FastGrind by SuperOptical: Booth #2836.** See FastGrind in action! Learn how this system can revolutionize your in-office lens production. Improve control, increase customer satisfaction, and lower your lens costs

3:00pm

- **GoodVision USA, Booth #1809:** Watch prescription glasses get made live from a single piece of wire using the world's smallest eyeglass factory — the portable, electricity-free technology that's brought vision care to over 1 million people in 11 countries.
